

SAP COURSES FOR TRAINING

**UDEMY PRO COURSES**

## Introduction

To facilitate the selection of the most suitable courses for **Cielito Home**, a general overview has been created of the content offered in various **SAP** courses on the **Udemy Pro** platform. This documentation compiles and organizes the topics covered in each course, helping to identify those that best align with the company's needs and the development of its employees.

The goal is to provide a clear perspective on the topics covered in the available courses, making it easier to determine which content is most relevant for internal training and process optimization within the company.

### 1. Course Name:

SAP for Beginners – Get Started with SAP

### 2. General Description:

This course is designed for beginners who want to familiarize themselves with SAP. Participants will learn how to navigate the SAP system, post documents, and understand the importance of ERP systems in a business environment.

### 3. Topics Covered:

- Navigate in SAP
- Post documents in SAP
- Learn why businesses need an ERP system like SAP
- Understand the structure of SAP
- Become familiar with common business processes in organizations
- Know the **Order-to-Cash** and **Purchase-to-Pay** processes in SAP in detail
- Understand the basic functionalities of SAP ERP

### 4. Key Strengths of the Course:

This course provides a clear and direct introduction to SAP, ideal for those with no prior experience. The instruction focuses on practical skills, such as navigation and document posting, providing a solid foundation for future learning. Additionally, it emphasizes the relevance of ERP systems in modern businesses, helping students understand the context and importance of SAP in business operations.

### 1. Course Name:

ChatGPT for SAP ABAP Development

### 2. General Description:

This course offers a unique blend of ABAP programming and ChatGPT artificial intelligence, enabling developers to leverage the power of ChatGPT in their SAP ABAP development cycle. It is designed to provide AI-assisted techniques that help develop code faster, troubleshoot more effectively, and produce high-quality software.

[udemy.com](https://www.udemy.com)

[udemy.com](https://www.udemy.com)

### 3. Topics Covered:

- Efficient use of ChatGPT for SAP ABAP development
- Writing ABAP code using ChatGPT
- Reducing ABAP development cycle time
- Using ChatGPT as coding assistance
- Employing ChatGPT as functional assistance
- Preparing for interviews using ChatGPT

### 4. Key Strengths of the Course:

This course stands out by integrating artificial intelligence into SAP ABAP development, providing developers with tools to enhance the efficiency and quality of their work. Upon completion, participants will be equipped to use ChatGPT as an assistant in both coding and functional aspects, optimizing the development cycle and preparation for SAP ABAP-related interviews.

## Conclusion

This document provides an overview of various **SAP** courses available on the **Udemy Pro** platform, aiming to facilitate the identification and selection of the most suitable ones for **Cielito Home**. Through a standardized structure, key aspects such as course descriptions, topics covered, and main strengths are presented, allowing for a quick understanding of each training's content and focus.

The purpose of this documentation is to serve as a clear and accessible guide to help employees develop **SAP** skills and enhance their understanding of the system's different modules and functionalities. This will contribute to optimizing internal processes and fostering professional growth within the company.

As additional courses are reviewed and evaluated, this documentation can be expanded and updated to reflect new learning opportunities, ensuring that **Cielito Home** team members have the necessary resources for their **SAP** training.
